

# Piranha

## FOR USE ON SPILLS ON HARD SURFACES

### Works on crude oil, refined oils and fuels.

Activated by fresh, salt, or brackish water.

## PRODUCT DATASHEET

### PIRANHA

Piranha contains a special blend of micro & macro nutrients and oil degrading microbes, that are blended into a dry absorbent powder. Our microbes have been selected for their ability to breakdown and convert fossil fuel hydrocarbons. Archaea can tolerate harsh environmental conditions and degrade a diverse variety of materials. Piranha converts and recycles hydrocarbons into non toxic byproducts. This product is not intended for use on water surfaces.

#### APPLICATION RATE

2 to 3 pounds per cubic yard.  
2 to 3 pounds per 27 square feet.

Direct contact is essential. For this product to work it has to come into contact with the spilled material.

#### APPLICATION METHOD

- 1 Broadcast or sprinkle product to completely cover the spilled material. Let sit in place at least 5 min. to allow product to soak into the spill.
- 2 Add water to activate the product. A light application with a garden hose or mister works. Moisture needs to be at least 10%.
- 3 Depending on size of the spill you may need to reapply the product.

#### CONTAMINANTS TREATED INCLUDE:

Simple, complex and chlorinated hydrocarbons. Fossil fuels, oils and other petroleum products, solvents, herbicides, and pesticides.

Need more information?  
Visit our website for a detailed list of degradable products.

#### PRODUCT DETAILS

Tan gray powder  
Organic and non toxic  
Proprietary archaea blend  
Micro & macro nutrients  
5 yr+ shelf life  
Salinity tolerance < 24%  
Temperature range - 32F-120F  
pH tolerance 5.5 - 10.5

#### PACKAGING

Standard size - 25lb. bags or buckets  
40 bags = pallet / 36 buckets = pallet  
Other sizes available upon request.

#### SAFETY & HANDLING

Keep product in a dry location.  
For specific information regarding safe handling of the material please refer to S.D.S at [www.obio.com](http://www.obio.com)
